TECHNICAL NOTE

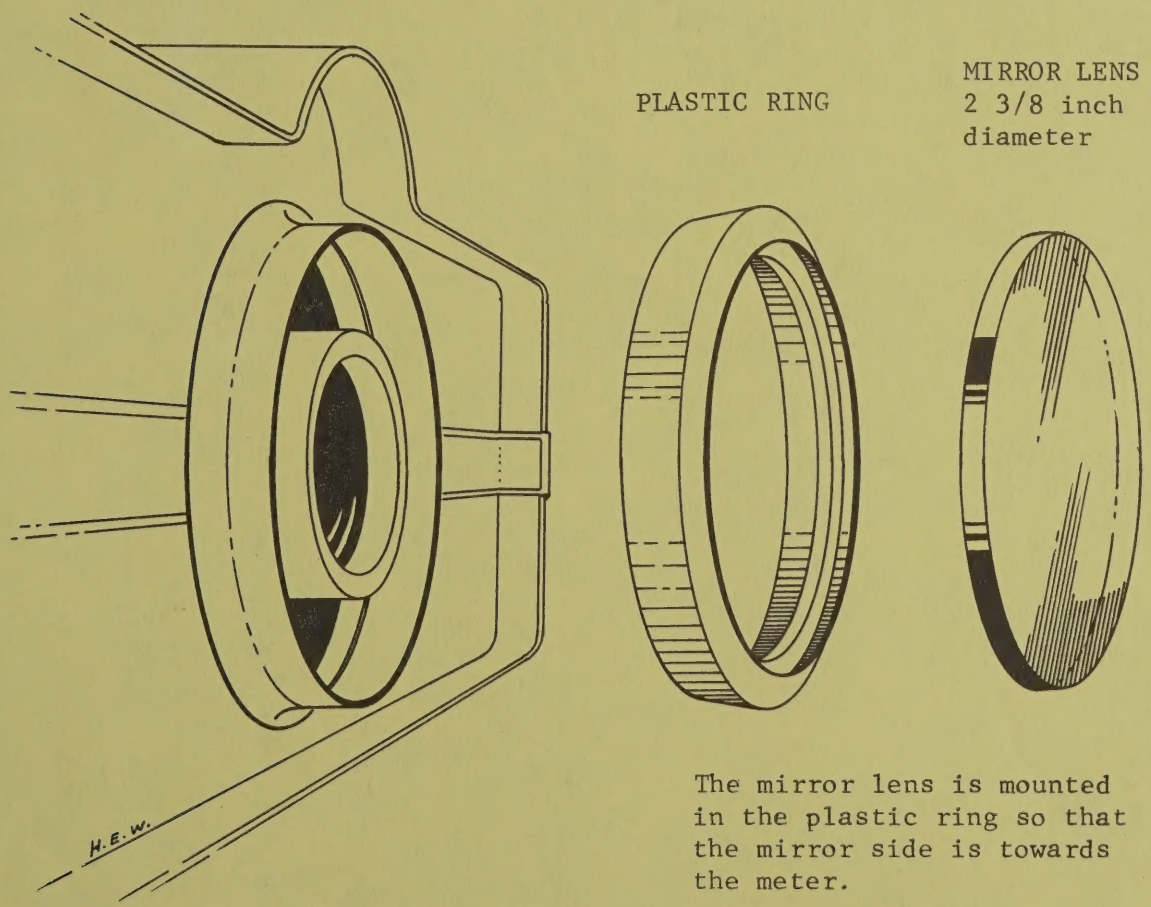
U.S. DEPARTMENT OF THE INTERIOR – BUREAU OF LAND MANAGEMENT

MIRROR PLATE ATTENUATOR LENS

by

Roger D. McLaughlin
Office of Cadastral Survey
Denver Service Center

An inexpensive mirror plate attenuator lens for Hewlett Packard Distant Meters is recommended for optional use by Bureau offices. The attenuator lens mounts over the receiver lens to obtain the proper return signal from the reflectors. During field use the attenuator lens may be broken. A replacement lens from Hewlett Packard costs about $32.00 each, whereas a mirror plate lens obtained from most glass companies costs about $3.75 each.



The mirror lens is mounted in the plastic ring so that the mirror side is towards the meter.

Additional copies of Technical Notes are available from DSC, Federal Center Building 50, Denver, Colo., 80225
